Welcome page & Menu

The screenshot displays the Expleo X Platform interface. On the left is a dark sidebar menu with the 'expleo X Platform' logo at the top. Below the logo are tabs for 'Apps', 'QIP', 'Fav', and 'Search'. The 'Apps' tab is active, showing a list of categories: 'Explore & Plan', 'Develop & Build', 'Test', 'Deploy & Operate', 'Monitor & Manage', 'Innovation & Incubation', and 'Solution Catalogue'. At the bottom of the sidebar are links for 'Help' and '2.2 Version no'. The main content area has a top navigation bar with a 'Search by Keyword' input field, a user profile icon, and the text 'asg_multi_new'. The main body contains a 'Welcome to X Platform' message, a description of the platform as a 'one stop shop', and a 'Driving Innovation' section with an illustration of people working on a large lightbulb. A 'Give us Feedback' button is located at the bottom right.

Search the Apps/QIP by Keyword

Click to **logout** from XPlatform

Click & explore the **Apps Menu by category wise**

Click to view the **Help option** like accessing user guide etc..

Click to view **Version History & What's New** in X Platform

Click to here to **Give us Feedback**

Click the app name
from the **Search Result**

The screenshot displays the Expleo Platform interface. On the left, a dark sidebar contains the 'expleo X Platform' logo and navigation tabs: 'Apps', 'QIP', 'Fav', and 'Search'. Below these tabs is a list of application names: DataGuru, Tonic.ai, Enov8DCS, Veracode, Auto-Q BA, Opkey, Auto-Q_Tech Test, Tricentis, and UFT One. A yellow bracket highlights this list, with a callout indicating to click an app name from the search results.

The main content area on the right shows the search results for 'eXtend - Integrated Development Environment'. At the top, there's a search bar with 'API' entered and a magnifying glass icon. The user profile 'asg_multi_new' is visible in the top right. The search result card for 'eXtend' includes a star icon, a category 'Data Compliance & Management', and a title 'eXtend - Integrated Development Environment'. Below this, a 'Description' section states that eXtend is an internally hosted open-source development platform. It lists several services: Source Code Management, Project Management, Continuous Integration CI / Continuous Delivery CD, Issue Management, Repository Management, Requirement and Test Management, Help Desk, and Code Quality and Security. A note at the bottom of the description refers to the platform's landing page for more details on services and tooling. At the bottom right of the card are links for 'More details' and 'Read about tooling'. The footer of the page includes a 'Help' link, a version number '2.2', and a 'Give us Feedback!' button.

Thank You
