ScriptGenie – test scripting simplified

This unique solution accelerator enables faster card life cycle testing with 100% coverage while significantly reducing cost.

The fastest way to generate test scripts

ScriptGenie is an automated test script generator, suitable for end-to-end card life cycle testing. It helps to perform high quality testing.

The solution is pre-packaged and comes with 2,500+ cards specific domain reusable components, that can dynamically generate scripts with end-to-end coverage as per configuration & need.

Your benefits with ScriptGenie

70%
faster testing

100%
coverage

35%
cost savings

Flexible

- Ability to generate scripts based on business criticality
- Slice & Dice based on product / function / scheme

Right coverage

- Comprehensive functional coverage
- Scientific approach to identify impacted scripts for regression

Standardized

- Generated test scripts standardized & easily readable
- Can be integrated with any test management tool

Granular & automated

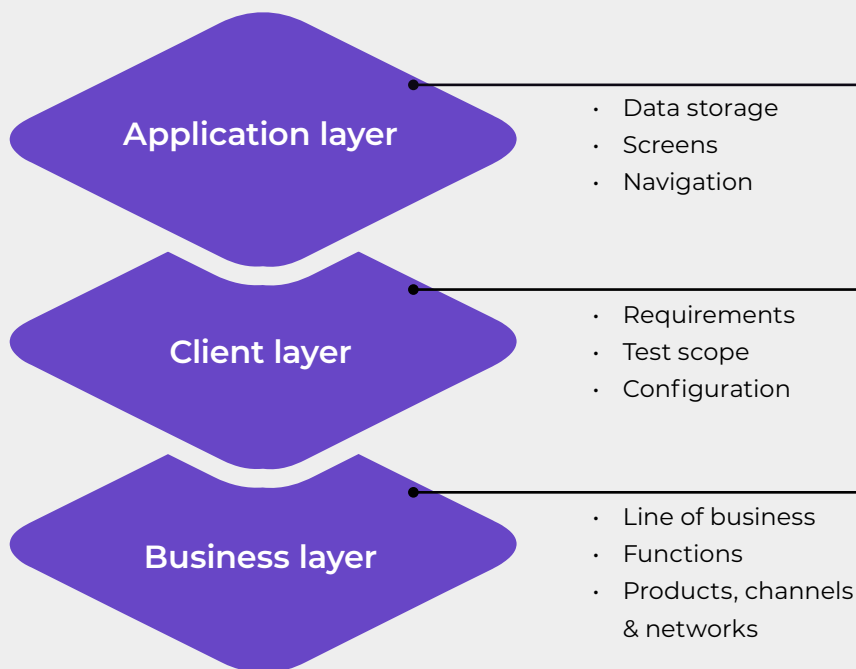

- Detailed test steps covering Screen/Field navigation based on application
- Generation of directly executable automation test scripts

Maintainable

Adoption to ever changing business requirements much easier with domain reusable components

Engineering of ScriptGenie

Three layers of mutually exclusive Plug & Play domain re-usable components

For further information, or if you have any other questions, please write a mail to info@expleogroup.com

Beyond repository

- Unique solution accelerator that can not only generate manual test scripts, but also execute scripts automatically
- ScriptGenie is a generator of test scripts using domain reusable components
- ScriptGenie is highly configurable & easily adaptable to any changes in the business requirement / applications
- Addition of scenarios with steps is automated by modifying / adding the required domain reusable components
- Capable of generating automation test scripts, thereby achieving true shift-left
- Easily extendable to ML & AI algorithms to generate scripts for new requirements
- True solution accelerator that caters to business, technical & testing needs
